DETAILED ACTION

Election/Restrictions

Claims 9, 10, 26, 27, 34-41 and 53 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 6.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 11-16, 20-25, 28-33, 42-52 and 55-57 are rejected under 35 U.S.C. 102(b) as being anticipated by West et al. '200. West et al. disclose an elongated medical instrument comprising an instrument body (20) extending between a proximal end and a distal end, an elongated pull wire lumen (56) that extends parallel with and radially offset from the instrument body distal axis, an inelastic pull wire (58) extending through the pull wire lumen and the instrument body being formed of elastic material.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3739

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over West et al. '200 further in view of Cookston et al. '031. West et al. teach all of the limitations of the claims except the pull wire being formed of a conductive material. Cookston et al. disclose a pull wire formed of a conductive material that allows the wire to achieve different curvatures. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a pull wire formed of a conductive material with the Cookston et al. device to provide a means of achieving different curvatures.

Response to Arguments

Applicant's arguments filed 1/12/04 have been fully considered but they are not persuasive.

Applicant argues that West does not teach an instrument body proximal segment that is formed of an elastic material capable of being stretched axially under axially applied tension. In column 8 lines 40-42 West disclose an instrument body constructed of a flexible polymer material. It is inherent in this teaching of the material being flexible that it is also capable of being stretched axially under axially applied tension.

Applicant also argues that West does not teach a proximal and distal tension applying ring as set forth in claim 28 or a tension applying means for selectively applying axial tension directly at the instrument body proximal section. In Figure 1 of West proximal (44 or 42) and distal (40) tension applying rings are illustrated.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
